

Print your Flying Kookburra template onto paper or lightweight card. Colour it with pencil, texta or paint and cut it out.

Your Kookaburra is only printed on one side so you can colour the other side however you wish.

Fold along dotted lines.

You might need to adjust the degree of fold in the wings for best flying.

You can also tape a small (5 cent) coin into the fold behind the eye for better flying stability.

Adjust the wing folds and coin placement until you get the best flying results, then glue or tape the sides together.

Happy flying!

FLYING KOOKABURRA
